

Laboratory Report

Laboratory #:	20414	Call Name:	Guinness
Order #:	7874	Registered Name:	Hurley Last Call Guinness at Boweryrn
Ordered By:	Lori Lutz	Breed:	Labrador Retriever
Ordered:	Jan. 2, 2016	Sex:	Male
Received:	Jan. 11, 2016	DOB:	April 2011
Reported:	Jan. 21, 2016	Registration #:	SR67759002
		Microchip #:	985121009143926

Results:

Disease	Gene	Genotype	Interpretation
Centronuclear myopathy	<i>PTPLA</i>	WT/WT	Normal (clear)
Cystinuria (Labrador Retriever type)	<i>SLC3A1</i>	WT/WT	Normal (clear)
Degenerative myelopathy	<i>SOD1</i>	WT/WT	Normal (clear)
Progressive retinal atrophy, Cone-rod dystrophy 4	<i>RPGRIP1</i>	WT/WT	Normal (clear)
Progressive retinal atrophy, Golden Retriever 2	<i>TTC8</i>	WT/WT	Normal (clear)
Progressive retinal atrophy, Progressive rod-cone degeneration	<i>PRCD</i>	WT/WT	Normal (clear)
Pyruvate kinase deficiency (Labrador Retriever type)	<i>PKLR</i>	WT/WT	Normal (clear)
Retinal dysplasia/Oculoskeletal dysplasia 1	<i>COL9A3</i>	WT/WT	Normal (clear)

WT, wild type (normal); M, mutant

Interpretation:

Molecular genetic analysis was performed for eight specific mutations reported to be associated with disease in dogs. We identified two normal copies of the DNA sequences in the mutations tested.

Recommendations:

No mutations were identified. Thus, this dog is not at an increased risk for the diseases caused by or associated with the mutations tested. Because this dog is "clear" of these diseases, this dog will only pass the normal genes on to its offspring. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. Paw Print Genetics™ has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.

Christina J Ramirez, PhD, DVM, DACVP
Medical Director

Casey R Carl, DVM
Associate Medical Director

Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics™. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results.
